Cleaner and redrawer crisis!

Hello, readers! Glad about this release? Yeah, we know it took a while.

Sadly, most of our series are in a similar predicament, for their teams are not complete. We are severely understaffed for editors. So if you are a Photoshop savant and have free time and interest in scanlation and in our series, please consider applying. We're at the end of our ropes here! Help!

Current positions
(http://goo.gl/ZcVYfG)

- *Funouhan*: we need a super redrawer. You will have to take either our full redrawing test or a series tailored one and pass with honours. Series description: https://goo.gl/OVqEZc

- Demon *assassins*: right now it is stalled because of me, the over-ambitious translator, but when chapter 02 comes out we will need a top-notch redrawer for future chapters. The requirements are the same as for *Funouhan*. Series description: https://goo.gl/BhvDjd

- *Sprite*: we need a new cleaner. Applicants must master Levelling, Straightening and Cropping, Unwarping, Dodging and Burning, have some sense of when and how to use Sharpening filters (for when Unwarping blurs the page, for example) and know how to use a Bubble-cleaning action (if they don't have it, we can supply one). And of course know to choose the tools needed according to the situation.

Needless to say, all these series are in hiatus until the positions are filled.
